Project Details

Project name	tkt.ge Testing
Designed by	Valeri Marsagishvili
Date of Creation	20 March
Date of Execution	24 March
Total test cases	54
Passed	45
Failed	9
Modules covered	- Sign Up - Login - Seat Selection

Sign Up page - Test Cases

Test Case ID	Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status
TC_SU_001	Signup Step 1 Verify validation for empty fields	User is on the sign up page	1.Leave fields empty 2.Click "გაგრძელება"	1.სახელი: Empty 2.გვარი: Empty 3.ელფოსტა: Empty 4.პაროლი: Empty 5.გაიმეორე პაროლი: Empty	System should display error messages for all required fields indicating that they cannot be empty	System displays error messages for required fields "სავალდებულო ველი" "გთხოვთ, შეიყვანეთ ელფოსტის სწორი მისამართი" "პაროლი უნდა შედგებოდეს მინიმუმ 8 სიმბოლოსგან"	pass
TC_SU_002	Signup Step 1 Verify validation for name / last name exceeding maximim character limit	User is on the sign up page	1.put too many chars in name/last name 2.fill other fields correctly 3.click "გაგრძელება"	1.სახელი: too many chars 2.გვარი: too many chars 2.other fields: valid data	System should prevent the user from proceeding when the input exceeds maximum allowed length	System displays error messages for fields exceeding the maximum allowed character limit "სახელი არ უნდა აღემატებოდეს 60 სიმბოლოს" "გვარი არ უნდა აღემატებოდეს 60 სიმბოლოს"	pass
TC_SU_003	Signup Step 1 Verify validation for invalid email format	User is on the sign up page	1.put in wrong email format 2.fill other fields correctly 3.click "გაგრძელება"	1.ელფოსტა: invalid format 2.other fields: valid data	System should prevent the user from proceeding when invalid email format is used	System displays error message for invalid email format "გთხოვთ, შეიყვანეთ ელფოსტის სწორი მისამართი"	pass
TC_SU_004	Signup Step 1 Verify validation for email exceeding maximum character limit	User is on the sign up page	1.put in email too long 2.fill other fields correctly 3.click "გაგრძელება"	1.ელფოსტა: too long 2.other fields: valid data	System should prevent the user from proceeding when email exceeds maximum allowed length	System accepted the input without errors and allowed the user to proceed to the next step	fail
TC_SU_005	Signup Step 1 Verify validation for weak password	User is on the sign up page	1.put in weak password 2.fill other fields correctly 3.click "გაგრძელება"	1.პაროლი: weak(123) 2.other fields: valid data	System should prevent the user from proceeding when password is weak	System displays error message for weak password "პაროლი უნდა შედგებოდეს მინიმუმ 8 სიმბოლოსგან"	pass
TC_SU_006	Signup Step 1 Verify validation for password exceeding maximum character limit	User is on the sign up page	1.put in too long password 2.fill other fields correctly 3.click "გაგრძელება"	1.პაროლი: too long 2.other fields: valid data	System should prevent the user from proceeding when password exceeds maximum allowed length	System displays error message for password exceeding the maximum allowed character limit "პაროლი არ უნდა აღემატებოდეს 64 სიმბოლოს"	pass
TC_SU_007	Signup Step 1 Verify validation for confirm password not matching password	User is on the sign up page	1.put in correct password 2.put mismatching password in confirm password 3.fill other fields correctly 4.click "გაგრძელება"	1.პაროლი: valid(8+ symbols, uppercase, numbers, special chars) 2.გაიმეორე პაროლი: not matching 3.other fields: valid data	System should prevent the user from proceeding when password and confirm password fields don't match	System displays error message for confirm password field not matching password field "პაროლები არ ემთხვევა"	pass
TC_SU_008	Signup Step 1 Verify validation for special characters in name / email	User is on the sign up page	1.put in name with special chars 2.put in email with special chars 3.fill other fields correctly 4.click "გაგრძელება"	1.სახელი: special chars in name 2.ელფოსტა: special chars in email 3.other fields: valid data	System should prevent the user from proceeding when name / email contains special characters	System displays error message for name / email having special characters "სახელი უნდა მოიცავდეს მხოლოდ ასოებს" "გთხოვთ, შეიყვანეთ ელფოსტის სწორი მისამართი"	pass

TC_SU_009	Signup Step 1 Verify that system properly handles SQL injection input in name field	User is on the sign up page	1.sql injection input in name 2.click "გაგრძელება"	1.სახელი: ' OR 1=1 --	System should reject input or treat it as plain text	System treats SQL injection input as plain text and displays error message "სახელი უნდა მოიცავდეს მხოლოდ ასოებს"	pass
TC_SU_010	Signup Step 1 Verify validation of email containing leading / trailing spaces	User is on the sign up page	1.space after/before/in between valid email 2.click "გაგრძელება"	1.ელფოსტა: valid with spaces after/before/in between	System should prevent the user from proceeding when email contains leading / trailing spaces	System displays error message for email having leading / trailing spaces "გთხოვთ, შეიყვანეთ ელფოსტის სწორი მისამართ"	pass
TC_SU_011	Signup Step 1 Verify successful pasting of a valid email address into the email field	User is on the sign up page	1.copy email from different app 2.paste it into email field 3.click "გაგრძელება"	1.ელფოსტა: paste from clipboard	System should allow the user to paste valid email into the field	System accepted the input without errors	pass
TC_SU_012	Signup Step 1 Verify correct update for all labels after switching language	User is on the sign up page	1.toggle language to english	1.language button: georgian to english	System should update all labels to correct translation	The page labels were successfully updated to correct english translation	pass
TC_SU_013	Signup Step 1 Verify persistence of entered data after switching language	User is on the sign up page	1.fill empty fields with data 2.switch language	1.all fields: valid data 2.language button: georgian to english	System should retain all data after the user switches language	The page reloads after language switch and all the data resets in the fields	fail
TC_SU_014	Signup Step 1 Verify acceptance for all valid data entry	User is on the sign up page	1.fill every field with valid data 2.click "გაგრძელება"	1.all fields: valid data	User should be redirected to the next step of the registration process	User is successfully directed to the next page	pass
TC_SU_015	Signup Step 2 Verify validation for empty fields	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.leave empty fields 2.click "ანგარიშის შექმნა"	1.სქესი: empty 2.დაბადების წელი: empty 3.ტელეფონის ნომერი: empty 4.SMS კოდი: empty 5.ვეთანხმები წესებს: empty 6.ვეთანხმები კონფიდენციალობას: empty	System should display error messages for all required fields indicating that they cannot be empty	System displays error messages for required fields "სავალდებულო ველი" "სავალდებულო ველი" "ტელეფონის ნომერი უნდა შეიცავდეს 9 სიმბოლოს" "SMS კოდი უნდა შეიცავდეს 4 სიმბოლოს" "სავალდებულო ველი" "სავალდებულო ველი"	pass
TC_SU_016	Signup Step 2 Verify validation for manually typing birth year into the field	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.type in valid birth year 2.hit enter	1.დაბადების წელი: 2000	System should allow the user to enter birth year manually	System accepts birth year value	pass

TC_SU_017	Signup Step 2 Verify validation for future / too old birth year	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.type future/too old year in birth year 2.hit enter	1.დაბადების წელი: 2040/1800	System should prevent the user from proceeding when entering future / too old birth year	If there was valid year selected before it will reset to it or "Expected string, received null" will show	pass
TC_SU_018	Signup Step 2 Verify validation for letters / special characters in birth year	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.type letters or special characters in birth year 2.hit enter	1.დაბადების წელი: abc@!	System should prevent the user from proceeding when using letters / special characters in birth year	If there was valid year selected before it will reset to it or "Expected string, received null" will show	pass
TC_SU_019	Signup Step 2 Verify validation for mixed input in birth year	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.type valid year then add letters or special chars 2.hit enter	1.დაბადების წელი: 1980ab%	System should prevent the user from proceeding when entering mixed input in birth year	If there was valid year selected before it will reset to it or "Expected string, received null" will show	pass
TC_SU_020	Signup Step 2 Verify validation for leading / trailing spaces in birth year	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.type valid year and add space before or after it 2.hit enter	1.დაბადების წელი: 2000	System should prevent the user from proceeding when birth year contains leading / trailing spaces	If there was valid year selected before it will reset to it or "Expected string, received null" will show	pass
TC_SU_021	Signup Step 2 Verify confirmation of valid birth year after losing field focus	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter valid year in birth year 2.click outside of field	1.დაბადების წელი: 2010	System should retain the entered value	If there was valid year selected before it will reset to it or "Expected string, received null" will show	fail
TC_SU_022	Signup Step 2 Verify validation for invalid number format	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter wrong phone number 2.click "კოდის მიღება"	1.ტელეფონის ნომერი: 123456789	System should prevent the user from proceeding when using invalid number format	System displays error message for invalid number format "ტელეფონის ნომრის ფორმატი არასწორია"	pass
TC_SU_023	Signup Step 2 Verify validation for long / short number	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter short/long phone number 2.click "კოდის მიღება"	1.ტელეფონის ნომერი: 5959 / 12345678910	System should prevent the user from proceeding when using long / short number	System displays error message for number being too long / short "ტელეფონის ნომერი უნდა შეიცავდეს 9 სიმბოლოს"	pass

TC_SU_024	Signup Step 2 Verify validation for letters / special characters in number	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter letters and special chars phone number 2.click "კოდის მიღება"	1.ტელეფონის ნომერი: abcd!@#$%	System should prevent the user from proceeding when using letters / special characters in number	System displays error message for number having letters / special characters "ტელეფონის ნომერი უნდა შეიცავდეს მხოლოდ ციფრებს"	pass
TC_SU_025	Signup Step 2 Verify validation for leading / trailing spaces in number	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.add space before or after phone number 2.click "კოდის მიღება"	1.ტელეფონის ნომერი: space then valid phone number	System should prevent the user from proceeding when number contains leading / trailing spaces	System displays error message for number having leading / trailing spaces "ტელეფონის ნომერი უნდა შეიცავდეს 9 სიმბოლოს"	pass
TC_SU_026	Signup Step 2 Verify validation for submitting an SMS code if no code has been requested yet	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter sms code without requesting a code 2.click "ანგარიშის შექმნა"	1.SMS კოდი: 1234	System should prevent the user from proceeding when entering SMS code	System displays error message for invalid SMS code "ამ კოდს ვადა გაუვიდა. გთხოვთ, მოითხოვეთ ახალი"	fail
TC_SU_027	Signup Step 2 Verify validation for invalid SMS code	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter invalid sms code 2.click "ანგარიშის შექმნა"	1.SMS კოდი: 9999	System should prevent the user from proceeding when entering invalid SMS code	System displays error message for invalid SMS code "კოდი არასწორია. დარჩენილია 2 მცდელობა"	pass
TC_SU_028	Signup Step 2 Verify validation for long / short SMS code	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter short/long sms code 2.click "ანგარიშის შექმნა"	1.SMS code: 123 / 1234567	System should prevent the user from proceeding when using long / short SMS code	System displays error message for SMS code being too long / short "SMS კოდი უნდა შეიცავდეს 4 სიმბოლოს"	pass
TC_SU_029	Signup Step 2 Verify validation for letters / special characters in SMS code	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter letters and special chars in sms code 2.click "ანგარიშის შექმნა"	1.SMS code: ab!@	System should prevent the user from proceeding when using letters / special characters in SMS code	System displays error message at the top of the page "დაფიქსირდა შეცდომა"	fail
TC_SU_030	Signup Step 2 Verify validation for mixed input in SMS code	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter digits and letters in sms code 2.click "ანგარიშის შექმნა"	1.SMS code: 12ab	System should prevent the user from proceeding when entering mixed input in SMS code	System displays error message at the top of the page "დაფიქსირდა შეცდომა"	fail

TC_SU_031	Signup Step 2 Verify acceptance for all valid data entry	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.enter valid data in all fields 2.click "ანგარიშის შექმნა"	1.all fields: valid data	User should be redirected to the next step of the registration process	User is successfully directed to the next page	pass
TC_SU_032	Signup Step 2 Verify persistence of entered data after switching language	User entered valid data, clicked "გაგრძელება" button and now is on "პირადი ინფორმაცია" page	1.fill empty fields with data 2.switch language	1.all fields: valid data 2.language button: georgian to english	System should retain all data after the user switches language	The page reloads after language switch and user is directed to first sign up page data resets	fail
TC_SU_033	Signup Step 3 Verify validation for invalid email code	User clicked "ანგარიშის შექმნა" and has to verify email	1.enter invalid email code 2.click "გაგრძელება"	1.email code: 1234	System should prevent the user from proceeding when entering invalid email code	System displays error message for invalid email code "კოდი არასწორია. დარჩენილია 2 მცდელობა"	pass
TC_SU_034	Signup Step 3 Verify validation for long / short email code	User clicked "ანგარიშის შექმნა" and has to verify email	1.enter short/long email code 2.click "გაგრძელება"	1.email code: 123, [100 chars]	System should prevent the user from proceeding when entering long / short email code	System displays error message for email code being too long / short "კოდი უნდა შეიცავდეს 4 სიმბოლოს"	pass
TC_SU_035	Signup Step 3 Verify validation for letters / special characters in email code	User clicked "ანგარიშის შექმნა" and has to verify email	1.enter letters/special chars 2.click "გაგრძელება"	1.email code: ab!@	System should prevent the user from proceeding when using letters / special characters in email code	System displays error message for email code having letters / special characters "კოდი არასწორია. დარჩენილია 1 მცდელობა"	pass
TC_SU_036	Signup Step 3 Verify acceptance for all valid data entry	User clicked "ანგარიშის შექმნა" and has to verify email	1.enter valid email code 2.click "გაგრძელება"	1.email code: valid code	User should successfully create account	The user successfully creates the account	pass

Login Page - Test Cases

Test Case ID	Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status
TC_Login_001	Verify validation for empty fields	User is on the login page	1.leave fields empty 2.click login button	1.ელფოსტა: empty 2.პაროლი: empty	System should display error messages for all required fields indicating that they cannot be empty	System displays error messages for required fields "სავალდებულო ველი" "სავალდებულო ველი"	pass
TC_Login_002	Verify validation for invalid email format	User has an account and is on the login page	1.enter invalid email format 2.click login button	1.ელფოსტა: invalid 2.პაროლი: anything	System should prevent the user from proceeding when using invalid email format	System displays error message for invalid email format "გთხოვთ, შეიყვანეთ ელფოსტის სწორი მისამართი"	pass
TC_Login_003	Verify validation for using unregistered email	User has an account and is on the login page	1.enter unregistered email 2.click login button	1.ელფოსტა: unregistered 2.პაროლი: anything	System should prevent the user from proceeding when using unregistered email	System displays error message at the top of the page " სახელი ან პაროლი არასწორია"	pass
TC_Login_004	Verify trimming of leading / trailing spaces in email	User has an account and is on the login page	1.enter spaces in email field 2.click login button	1.ელფოსტა: valid with spaces 2.პაროლი: valid	System should remove extra spaces and accept the valid email format	System treats spaces as characters and invalid email error shows up	fail
TC_Login_005	Verify trimming of leading / trailing spaces in password	User has an account and is on the login page	1.enter spaces in password field 2.click login button	1.ელფოსტა: valid 2.პაროლი: valid with spaces	System should include the spaces as part of the password string	System doesnt treat spaces as characters and logs user in	fail
TC_Login_006	Verify validation for case sensitivity in email	User has an account and is on the login page	1.enter email in all caps 2.enter valid password 3.click login button	1.ელფოსტა: valid in all caps 2.პაროლი: valid	System should accept the input as a valid email	System allows user to successfully log in	pass

TC_Login_007	Verify validation for case sensitivity in password	User has an account and is on the login page	1.enter valid email 2.enter valid password in all caps 3.click login button	1.ელფოსტა: valid 2.პაროლი: valid in all caps	System should reject the case-sensitive password	System displays error message for invalid password "სახელი ან პაროლი არასწორია"	pass
TC_Login_008	Verify that system properly handles XSS attack input in email field	User has an account and is on the login page	1.enter XSS script in email 2.enter anything in password 3.click login button	1.ელფოსტა: <script>alert('XSS')</script> 2.პაროლი: anything	System should reject input or treat it as plain text	System treats XSS attack input as plain text and displays error message "გთხოვთ, შეიყვანეთ ელფოსტის სწორი მისამართი"	pass
TC_Login_009	Verify "Forgot Password" button works properly	User has an account and is on the login page	1.click forgot password button	1.პაროლის აღდგენა	System should redirect the user to password recovery page	User is directed to password recovery page	pass
TC_Login_010	Verify acceptance for all valid data entry	User has an account and is on the login page	1.enter valid email 2.enter valid password 3.click login button	1.ელფოსტა: valid 2.პაროლი: valid	System should let the user log in	User logs in successfully	pass
TC_Login_011	Verify user can't access account using browser back button after signing out	User signs in and signs out	1.click log out button 2.click back button on browser	N/A	System should redirect the user back to the login page	User is redirected into the active session	fail

Seat Selection Page - Test Cases

Test Case ID	Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status
TC_ST_001	Verify acceptance of picking the day and cinema	User is on the cinema selection page	1.pick which day to watch the movie 2.pick which cinema and click it	1.day of the week: any 2.cinema: any	System should redirected user to the seat selection page	Seat selection page pops up	pass
TC_ST_002	Verify filtering tickets by price	User is on the seat selection page	1.choose ticket by price	1.ticket price filter	System should only highlight the seats applicable to the selected ticket price	Seats are highlighted based on selected price	pass
TC_ST_003	Verify validation for zoom limit	User is on the seat selection page	1.zoom in	1.zoom in button	System should stop zooming in after limit has been reached	User can zoom in infinitely until seat selection page crashes	fail
TC_ST_004	Verify session expiration	User is on the seat selection page and has selected a seat	1.select a seat 2.wait for session to run out	1.session	System should end session and seat is released	System displays error message for expired session "ოპერაციის შესასრულებლად განკუთვნილი 10 წუთი ამოიწურა. დაბრუნდი ღონისძიებაზე და დაიწყე თავიდან"	pass
TC_ST_005	Verify session persistence	User is on the seat selection page and has selected a seat	1.select a seat 2.refresh page	1.seat 2.refresh button	The session should remain active	The session stays on and user can either continue or discard	pass
TC_ST_006	Verify session handling for the same account on two different devices	User is logged in on the same account with 2 different devices and creates active session	1.select seat on one device 2.select another seat on second device	1.seats	User should not be able to select the same seats on different devices and total price should only reflect the seats selected on that specific device	Creates 2 different sessions, seats are updated instantly so user can't pick same seats on different devices	pass
TC_ST_007	Verify confirmation for "next" button	User is on the seat selection page, has selected a seat and clicked next button	1.select a seat 2.click next button	1.seat 2.next button	System should redirect the user to the payment page	User is directed to the card info page	pass

Bug Reports

Bug ID	Module	Summary	Severity	Priority	Steps	Expected Result	Actual Result	Environment
BUG_001	Signup	System allows progression with long email input	Medium	High	1.open signup page 2.enter an email exceeding maximum allowed length 3.fill other fields with valid data 4.click “Continue	System should prevent submission	User is allowed to proceed to the next step and button requires extra clicks to proceed	Chrome / Desktop
BUG_002	Signup	Input data is lost after switching language	Medium	High	1.fill all fields 2.switch language	Data should persist	Page reloads and data resets	Chrome / Desktop
BUG_003	Signup	Birthyear field data resets	Low	Low	1.go to step 2 2.enter birth year 3.click outside field	Value should remain	Field resets	Chrome / Desktop
BUG_004	Signup	SMS code can be submitted without requesting one	Medium	Medium	1.go to step 2 2.enter SMS code without requesting 3.submit	User should be prompted to request code	System shows expired code message	Chrome / Desktop
BUG_005	Signup	Mixed SMS input does not reduce attempts	High	High	1. enter mixed SMS input 2. submit multiple times	Attempts should decrease	Attempts not reduced	Chrome / Desktop
BUG_006	Login	Email field does not trim leading / trailing spaces and causes validation failure	Medium	Medium	1.enter a valid registered email with leading or trailing spaces 2.enter a valid password 3.click the "login" button	System should trim leading and trailing spaces from the email field and successfully log in the user	System treats spaces as part of the email input and displays an "invalid email format" error	Chrome / Desktop
BUG_007	Login	Password field incorrectly trims leading / trailing spaces and allows login	High	High	1.enter a valid registered email 2.enter the correct password with leading or trailing spaces 3.click the "login" button	System should treat spaces as part of the password and reject the login attempt	System ignores leading and trailing spaces in the password field and logs the user in	Chrome / Desktop
BUG_008	Login	Session persists after logout using browser back button	Critical	High	1.login 2.logout 3.press back button	User remains logged out	Session restored and user can act	Chrome / Desktop
BUG_009	Seat Selection	Unlimited zoom crashes page	High	Medium	1.open seat selection 2.zoom continuously	Zoom should have limit	Page crashes	Chrome / Desktop
