Project Details

Project name	PCShop.ge testing
Designed by	Valeri Marsagishvili
Date of Creation	1 October
Date of Executior	5 October
Total test cases	43
Passed	40
Failed	3
Modules covered	1. Login 2. Product Selection 3. Cart

Login - Test Cases

Test Case ID	Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Evidence
TC_Login_001	Verify login attempt with all fields empty	User is on the login page	1.Leave fields empty 2.Click login button	Email: Empty Password: Empty	An appropriate validation message is displayed, and the user is not logged in	An “Error: Username is required.” validation message is displayed, and the login attempt is not submitted successfully	Pass	TC_Login_001
TC_Login_002	Verify validation for empty email and valid password	User has an account and is on the login page	1.Leave email empty 2.Enter valid password 3.Click login button	Email: Empty Password: ValidPassword123!	An appropriate validation message is displayed, and the user is not logged in	The “Error: Username is required.” validation message is displayed, and the password field is cleared after the unsuccessful login attempt. The user is not logged in	Pass	TC_Login_002
TC_Login_003	Verify validation for valid email and empty password	User has an account and is on the login page	1.Enter valid email 2.Leave password empty 3.Click login button	Email: valid.test@example.com Password: Empty	An appropriate validation message is displayed, and the user is not logged in	The “Error: The password field is empty.” validation message is displayed while the entered email address remains in the email field. The user is not logged in	Pass	TC_Login_003
TC_Login_004	Verify error handling for invalid email formats	User is on the login page	1.Enter invalid email format 2.Enter any password 3.Click login button	Email: valid.test@ Password: AnyPassword123!	An appropriate validation message is displayed, and the user is not logged in	An error message is displayed stating that the username “valid.test@” is not registered on the site. The entered username remains in the username field, and the user is not logged in	Pass	TC_Login_004
TC_Login_005	Verify login failure when using an unregistered email	User is on the login page	1.Enter unregistered email 2.Enter any password 3.Click login button	Email: unregistered.test@example.com Password: AnyPassword123!	An appropriate validation message is displayed, and the user is not logged in	The “Unknown email address. Check again or try your username.” error message is displayed, the entered email address remains in the email field, and the user is not logged in	Pass	TC_Login_005 TC_Login_005_Headers TC_Login_005_Payload
TC_Login_006	Verify login failure when entering an incorrect password	User is on the login page and has an account	1.Enter valid email 2.Enter invalid password 3.Click login button	Email: valid.test@example.com Password: WrongPassword123!	An appropriate validation message is displayed, and the user is not logged in	The “Error: The password you entered for the email address is incorrect.” message is displayed, and the user is not logged in	Pass	TC_Login_006 TC_Login_006_Headers TC_Login_006_Payload
TC_Login_007	Verify successful login with valid credentials	User has an account and is on the login page	1.Enter valid email 2.Enter valid password 3.Click login button	Email: valid.test@example.com Password: ValidPassword123!	The user is successfully logged in and redirected to the My Account page	The user is successfully authenticated and redirected to the My Account page. The account dashboard is displayed with the user's account information and available account management options	Pass	TC_Login_HomePage TC_Login_Login_Headers TC_Login_007_Payload TC_Login_AccountPage_Headers
TC_Login_008	Verify trimming of leading / trailing spaces in email	User has an account and is on the login page	1. Enter an email with leading/trailing spaces 2. Enter a valid password 3. Click the Login button	Email: " valid.test@example.com " Password: ValidPassword123!	Leading and trailing spaces are automatically trimmed from the input, and the user is successfully logged in and redirected to the My Account page	The system ignored the extra spaces and logged the user in successfully, redirecting to the account page	Pass	TC_Login_HomePage TC_Login_AccountPage_Headers TC_Login_Login_Headers TC_Login_008_Payload
TC_Login_009	Verify trimming of leading / trailing spaces in password	User has an account and is on the login page	1. Enter a valid email 2. Enter a password with leading/trailing spaces 3. Click the Login button	Email: valid.test@example.com Password: " ValidPassword123! "	Password is not trimmed. Login with extra leading/trailing spaces added to the correct password fails with an invalid credentials error	The system ignored the extra spaces and logged the user in successfully, instead of rejecting the login	Fail	TC_Login_HomePage TC_Login_AccountPage_Headers TC_Login_Login_Headers TC_Login_009_Payload
TC_Login_010	Verify that email input is case-insensitive during login	User has an account and is on the login page	1.Enter email in all caps 2.Enter valid password 3.Click login button	Email: VALID.TEST@EXAMPLE.COM Password: ValidPassword123!	The email is treated as case-insensitive, and the user is successfully logged in and redirected to the My Account page	Entered the registered email in different letter casing with the correct password and clicked Login. The system logged the user in successfully	Pass	TC_Login_010_Payload TC_Login_HomePage

TC_Login_011	Verify that password input is case-sensitive during login	User has an account and is on the login page	1.Enter valid email 2.Enter valid password in all caps 3.Click login button	Email: valid.test@example.com Password: VALIDPASSWORD123!	The login attempt is rejected because the password is case-sensitive, and the user is not logged in	Entered the correct email and the correct password with different letter casing, then clicked Login. The system rejected the login and showed an invalid credentials error	Pass	TC_Login_011 TC_Login_011_Payload
TC_Login_012	Verify system stability and input limits for excessively long credentials	User is on the login page	1.Enter excessively long email 2.Enter password 3.Click login button	Email: A string of about 1000 characters, no spaces Password: ValidPassword123!	The system rejects the login with an error message, the user is not logged in, and no crash, freeze or server error occurs	Entered an excessively long string in the email and valid password and clicked Login. The field accepted the full string with no character limit. The system rejected the login and showed an error message	Pass	TC_Login_012_Payload TC_Login_012
TC_Login_013	Verify redirection to the "Lost your password" reset flow	User has an account and is on the login page	1.Click Lost your password button	None	The user is redirected to the appropriate Lost your password reset flow	Clicked the "Lost your password?" link on the login page. The user was redirected to the password reset page, which shows an email/username field and a "Reset password" button.	Pass	TC_Login_013
TC_Login_014	Verify toggling password visibility between masked and plain text	User is on the login page	1.Enter password 2.Toggle password visibility	Password: ValidPassword123!	The password switches between masked and visible states while the entered password remains unchanged	Entered a password and clicked the visibility icon. The password was displayed as plain text. Clicking the icon again masked it again. The entered text did not change	Pass	TC_Login_014_Masked TC_Login_014_Visible
TC_Login_015	Verify that copying data from the masked password field is restricted	User is on the login page	1. Enter a password 2. Attempt to copy the masked password 3.Try to paste it	Password: ValidPassword123!	The password cannot be copied from the masked field, and nothing is pasted	Entered a password in the masked field, selected it and tried to copy and cut it. Pasting it produced nothing, so the password could not be copied	Pass	TC_Login_015_Copy TC_Login_015_Paste
TC_Login_016	Verify that a logged-out user cannot access protected pages via the browser Back button	User has an account and is logged in	1. Click the log out button 2. Click the browser Back button	Valid user account	The logged-out user cannot access protected pages and sees the login page	Logged in, opened the account page, then logged out. Clicked the browser Back button. The login page was displayed and no account information was visible. Refreshing the page still showed the login page	Pass	TC_Login_HomePage TC_Login_016
TC_Login_017	Verify session persistence when "Remember Me" is enabled	User has an account and is on the login page	1.Enter valid email 2.Enter valid password 3.Click "remember me" 4.Click login button	Email: valid.test@example.com Password: ValidPassword123! Remember Me: Checked	The user remains logged in after the browser is closed and reopened, and the login cookies have a future expiry	Logged in with valid credentials and "Remember me" enabled. The login response set the wordpress_logged_in_ and wordpress_sec_ authentication cookies with an expiry of about 14.5 days (Max-Age). After closing and reopening the browser, the user was still logged in without entering credentials	Pass	TC_Login_017 TC_Login_017_Cookie TC_Login_017_Payload
TC_Login_018	Verify session termination upon browser closure when "Remember Me" is disabled	User has an account and is on the login page	1.Enter valid email 2.Enter valid password 3.Leave "remember me" unchecked 4.Click login button	Email: valid.test@example.com Password: ValidPassword123! Remember Me: Unchecked	The user is logged out after the browser is closed and reopened, and the login cookies are session cookies	Logged in with valid credentials and "Remember me" unticked. The login cookies had no expiry date and were session cookies. After closing and reopening the browser, the user was logged out and the login form was displayed	Pass	TC_Login_018 TC_Login_018_Cookie TC_Login_018_Payload
TC_Login_019	Verify that the session is invalidated after logout	User has an account and is logged in	1.Log in 2.Copy the session cookie/token 3.Log out 4.Attempt to access a protected page using the copied session cookie/token	Valid registered account	After logout, the session is terminated. The authentication cookies are removed, and accessing account pages directly redirects to the login page or asks for credentials	Logged in with valid credentials, then clicked Log out. The authentication cookies were cleared in the logout response and no longer present in the browser. Opening the account page directly by URL displayed the login form, so the session was no longer valid	Pass	TC_Login_019_Logged_in TC_Login_019_Logout

TC_Login_020	Verify page layout remains intact when excessively long text is entered in the email field	User is on the login page	1.Enter excessively long email 2.Press CTRL+A, then the right arrow key, to move to the end of the text 3.Observe the page layout and try to scroll left	Email: A string of about 1000 characters, no spaces	The layout stays intact. The input handles overflow, and no part of the page is cropped or unreachable	After pasting the string and moving the cursor to the end, the page layout expanded and shifted, and part of the left side of the page was cropped and could not be scrolled back into view. Clicking login button or refreshing the page cleared the issue	Fail	Reproduced 3 times initially. Could not be reproduced afterwards. tried incognito, pasted input, with and without DevTools open, larger input

Product Selection - Test Cases

Test Case ID	Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Evidence
TC_PS_001	Verify searching for an existing product using its exact name returns the target product	User is on the product listing page and products are available	1. Enter the exact name of an existing product in the search field 2. Submit the search	Search query: "16GB DDR4"	The target product matching the exact search query is displayed in the search results	Entered "16GB DDR4" in the search field and submitted the search. The search results page displayed products matching the query, including the target product	Pass	TC_PS_001 TC_PS_001_SearchBar
TC_PS_002	Verify searching for an existing product using a partial name returns matching results	User is on the product listing page and products are available	1. Enter a partial name of an existing product in the search field 2. Submit the search	Search query: "DDR4"	Products matching the partial search query are displayed in the search results	Entered the partial name "DDR4" in the search field and submitted the search. The results page displayed products whose names contain "DDR4"	Pass	TC_PS_002 TC_PS_002_SearchBar
TC_PS_003	Verify that searching for a nonexistent product returns no matching results	User is on the product listing page	1. Enter the name of a nonexistent product in the search field 2. Submit the search	Search query: "xqzvwk9917"	No matching products are displayed, and an appropriate message or empty-results state is shown	Entered "xqzvwk9917" in the search field and submitted the search. No products were displayed, and the message ". No products were found matching your selection." appeared	Pass	TC_PS_003 TC_PS_003_SearchBar
TC_PS_004	Verify that product search is case-insensitive	User is on the product listing page and products are available	1. Enter an existing product name using different letter capitalization in the search field 2. Submit the search	Search queries: "16GB DDR4" / "16gb ddr4"	The same relevant products are returned regardless of letter capitalization in the search query	Searched for "16GB DDR4" and then "16gb ddr4". Both searches returned the same products in the same order, so the search is not affected by letter capitalization	Pass	TC_PS_004 TC_PS_004_Low
TC_PS_005	Verify trimming of leading and trailing spaces in search queries	User is on the product listing page and products are available	1. Enter an existing product name with leading and trailing spaces in the search field 2. Submit the search	Search query: " 16GB DDR4 "	Leading and trailing spaces are ignored, and the search returns the same relevant results as the query without the spaces	Searched for " 16GB DDR4 " with leading and trailing spaces. The search ignored the extra spaces and returned the same amount of products as the search without spaces	Pass	TC_PS_004 TC_PS_005
TC_PS_006	Verify filtering products by category	User is on the product listing page and products are available in multiple categories	1. Select a product category from the available category filters 2. Apply the filter	Product: Smartphones Selected Brand: Samsung	Only products belonging to the selected category are displayed	Selected the "Samsung" category from the category filter. The product list updated and displayed only products belonging to "Samsung". The selected category was shown as active	Pass	TC_PS_006
TC_PS_007	Verify applying multiple filters simultaneously	User is on the product listing page and multiple filter options are available	1. Select two or more available filters 2. Apply the filters	Product: Smartphones Selected Brand: Samsung Selected Storage Capacity: 128GB	Only products matching all selected filter criteria are displayed	Selected the "Samsung" and "128GB" filters together. The product list updated and displayed only products matching both filters. Both filters were shown as active.	Pass	TC_PS_007
TC_PS_008	Verify that clearing active filters resets the product list	User is on the product listing page and at least one filter can be applied	1. Apply an available filter 2. Clear the active filter	Product: Smartphones Selected Brand: Samsung	The selected filter is cleared, and the product list returns to the unfiltered state	Applied the "Samsung" filter, which reduced the list to 33 products. Cleared the active filter. The filter was removed and the product list returned to the unfiltered state, 87 products.	Pass	TC_PS_008 TC_PS_008_Filter
TC_PS_009	Verify that filter options update based on the selected criteria	User is on the product listing page and multiple filter options are available	1.Select an available filter. 2.Observe the remaining filter options. 3.Select another available filter.	Product: Smartphones Selected Brand: Samsung Selected Memory Capacity: 4GB	The available filter options update based on the selected criteria, and only applicable filter values remain available for selection	Selected the "Samsung" filter and observed the remaining filter options. The options updated to show only values applicable to the selected category. After selecting "4GB", the options narrowed further and only applicable values remained.	Pass	TC_PS_009 TC_PS_009_Filter 1 TC_PS_009_Filter 2
TC_PS_010	Verify sorting products by available criteria	User is on the product listing page and multiple sorting options are available	1. Select an available sorting criterion 2. Apply the sorting option	Sort by: Price - low to high	Products are displayed in the selected sorting order, from the lowest price to the highest price	Selected "low to high" from the sort dropdown. The products were reordered from the lowest to the highest price. The selected sort option was shown in the dropdown	Pass	TC_PS_010

TC_PS_011	Verify changing the number of products displayed per page	User is on the product listing page and the option to change the number of displayed products is available	1. Select a different number of products to display per page 2. Apply the selection	Products per page: 20 -> 40	The selected number of products is displayed per page, and pagination updates accordingly if applicable	Changed the number of products per page from 20 to 40. The listing updated and displayed 40 products on the first page. The pagination updated to 3 pages, and the total number of results stayed the same.	Pass	TC_PS_011_Show 20 TC_PS_011_Show 40
TC_PS_012	Verify switching between product view modes	User is on the product listing page and multiple product view modes are available	1. Select a different product view mode 2. Apply the selected view mode	View mode: Grid -> List	Products are displayed using the selected view mode, and the product information remains accessible and correctly displayed	Switched the product view from grid to list using the view mode icon. The products were displayed in the selected mode, showing the same products with the image, name and price. The active icon was highlighted.	Pass	TC_PS_012 TC_PS_012_List
TC_PS_013	Verify that SQL injection input does not cause application errors or bypass search restrictions	User is on the product listing page and products are available	1.Enter a basic SQL injection string in the search field 2.Submit the search	Search query: ' OR '1'='1 Search query: '; --	The input is treated as plain search text. The search returns relevant results or an empty state in a reasonable time, with no database error, server error or stack trace shown, and no restricted data is exposed	Entered ' OR '1'='1: "No products were found matching your selection". Entered '; --: status 200 after about 10.3 seconds, with 380 products displayed. Entered ' : 153 products after about 5.5 seconds. Entered ; : the page did not load for more than 30 seconds, and a "a timeout occurred" message was displayed. No database error, server error or SQL/PHP error text appeared in any response, and the special characters were treated as search text and not executed.	Fail	TC_PS_013_Query1 TC_PS_013_Query1_Headers TC_PS_013_Query2 TC_PS_013_Query2_Headers TC_PS_013_Error
TC_PS_014	Verify that script input is treated as plain text and is not executed	User is on the product listing page and products are available	1.Enter an XSS Attack string in the search field 2.Submit the search	Search query: <script>alert('XSS')</script> Search query: <img src=x onerror=alert(1)>	The input is displayed as plain text or ignored. No alert box appears, no script runs, and the page layout is not broken	Entered <script>alert('XSS')</script> in the search field and submitted the search. No alert popup appeared and no script was executed. The input was treated as plain text, the search returned no results, and the layout remained intact. Entering <img src=x onerror=alert(1)> produced the same result.	Pass	TC_PS_014 TC_PS_014_Code1 TC_PS_014_Code2

Cart - Test Cases

Test Case ID	Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Evidence
TC_Cart_001	Verify that a product can be added to the cart	User is logged in, and at least one in-stock product is available on the product listing or product detail page	1. Open an in-stock product 2. Click Add to Cart 3. Open the shopping cart	Product: "Acer Aspire Lite AL15-45P-R2FX"	The selected product is added to the cart with the correct quantity and price, and the cart total is updated accordingly	Clicked Add to Cart on the product "Acer Aspire Lite AL15-45P-R2FX" from the product listing. The product was added to the cart and the cart page displayed it with quantity and price.	Pass	TC_Cart_001 TC_Cart_001_Add
TC_Cart_002	Verify that product quantity can be increased or decreased	User is logged in, and at least one product is present in the shopping cart	1. Open the shopping cart 2. Increase the product quantity 3. Click "Update Cart" 4. Decrease the product quantity 5. Click "Update Cart"	Product: "Acer Aspire Lite AL15-45P-R2FX" Quantity: 1 -> 2 -> 1	The product quantity is increased and decreased successfully, and the cart reflects the updated quantity after each update	Increased the quantity of "Acer Aspire Lite AL15-45P-R2FX" from 1 to 2 and clicked Update Cart. The cart updated to show quantity 2. Decreased the quantity back to 1 and clicked Update Cart. The cart updated to quantity 1.	Pass	TC_Cart_001 TC_Cart_002 TC_Cart_002_Updated
TC_Cart_003	Verify that product quantity limits are enforced based on stock availability	User is logged in, and a product with a known maximum purchasable quantity is present in the shopping cart	1. Open the shopping cart 2. Increase the product quantity up to the maximum allowed quantity 3. Attempt to increase the quantity beyond the maximum allowed quantity	Product: "Acer Aspire Lite AL15-45P-R2FX" Maximum quantity: 19 Attempted quantity: 25 Attempted quantity: -4	The system prevents the product quantity from exceeding the maximum allowed quantity based on stock availability and displays a stock limitation error message. Manually typing an invalid quantity, above the maximum or negative, is rejected with an error message, and the cart quantity cannot be updated.	Increased the quantity of the "Acer Aspire Lite AL15-45P-R2FX" to the maximum allowed and clicked Update Cart; the cart accepted it. The buttons did not allow the quantity to go above the maximum or below the minimum. Typed 25 manually in the quantity field and an error message "Value must be less than or equal to 19" was displayed. Typed -4 manually and an error message "Value must be greater than or equal to 0" was displayed. In both cases the cart could not be updated	Pass	TC_Cart_003 TC_Cart_003_Negative
TC_Cart_004	Verify that products can be removed from the cart	User is logged in, and at least one product is present in the shopping cart	1. Open the shopping cart page 2. Click the "Remove" button or trash icon next to the selected product	Product: "Acer Aspire Lite AL15-45P-R2FX" Removed product: "Anker 312 Charger 20W White"	The selected product is removed from the cart, and the cart contents and the cart total decreases to reflect the removal	Added two products to the cart and clicked Remove next to the "Anker 312 Charger 20W White". The product was removed from the cart, and "Acer Aspire Lite AL15-45P-R2FX" remained with its quantity and price. The cart total decreased. "Anker 312 Charger 20W White removed. Undo?" was displayed.	Pass	TC_Cart_004 TC_Cart_004_Removed
TC_Cart_005	Verify that a removed product can be restored using the "Undo" option	User is logged in, and at least one product is present in the shopping cart	1. Open the shopping cart 2. Click Remove for a product 3. Click Undo	Product: "Acer Aspire Lite AL15-45P-R2FX" Original quantity: 2	The removed product is restored to the cart with its previous quantity, and the cart total is updated to include the restored product	Removed "Acer Aspire Lite AL15-45P-R2FX" from the cart. The message "Acer Aspire Lite AL15-45P-R2FX removed. Undo?" was displayed. Clicked Undo. The product was restored to the cart with its previous quantity.	Pass	TC_Cart_005_Before&After TC_Cart_005_Removed
TC_Cart_006	Verify that the cart total is recalculated correctly after changing product quantity	User is logged in, and at least one product with a known unit price is present in the shopping cart.	1. Open the shopping cart page 2. Change the quantity of the product via the input field 3. Click the "Update Cart" button	Product: "Acer Aspire Lite AL15-45P-R2FX" Unit price: 2199₾ Quantity: 1 -> 2	The cart total is recalculated correctly based on the updated product quantity and unit price after clicking Update Cart	Changed the quantity of "Acer Aspire Lite AL15-45P-R2FX" from 1 to 2 and clicked Update Cart. The cart updated and the line subtotal changed from 2199₾ to 4398₾.	Pass	TC_Cart_006 TC_Cart_006_Updated
TC_Cart_007	Verify error handling when an invalid coupon is applied	User is logged in, and at least one product is present in the shopping cart	1. Open the shopping cart 2. Enter an invalid coupon code in the coupon field 3. Click Apply Coupon	Invalid coupon code: INVALIDCOUPON123	The invalid coupon is rejected, an appropriate error message is displayed, and the cart total remains unchanged	Entered the invalid coupon code "INVALIDCOUPON123" in the coupon field and clicked Apply Coupon. The coupon was rejected and the error message "Coupon "invalidcoupon123" cannot be applied because it does not exist." was displayed. The cart total remained unchanged and no discount was applied	Pass	TC_Cart_007

TC_Cart_008	Verify that the cart is synchronized across devices for the same account	User has an active account and access to the same account from two separate devices or browser sessions	1. Log in to the same account on Device/Browser A 2. Add a product to the cart or modify the existing cart 3. Open the same account on Device/Browser B 4. Open the shopping cart 5. Compare the cart contents and quantities between both sessions	Account: Test account PC: Chrome Phone: Brave Product: "Acer Aspire Lite AL15-45P-R2FX" Product: "Anker 312 Charger 20W White"	The cart contents and quantities are synchronized across both active sessions when using the same account	Logged in to the same account on a phone (Brave) and on a PC (Chrome). Added "Anker 312 Charger 20W White" to the cart on the phone. The cart on the PC did not update on its own and still showed the previous state. After refreshing the page on the PC, the same product and quantity were displayed, with the total. The cart is synchronized across devices for the same account, but changes appear only after a page refresh.	Pass	TC_Cart_008 TC_Cart_008_Refreshed TC_Cart_008_Phone
TC_Cart_009	Verify that clicking "Proceed to Checkout" navigates to the Checkout page	User is logged in, has at least one product in the cart, and is viewing the Cart page	1. Click Proceed to Checkout	Product: "Acer Aspire Lite AL15-45P-R2FX"	The Checkout page with the billing details and order summary is displayed	Clicked Proceed to Checkout on the cart page containing "Acer Aspire Lite AL15-45P-R2FX". The user was redirected to the Checkout page, which displayed the billing details form and an order summary showing "Acer Aspire Lite AL15-45P-R2FX".	Pass	TC_Cart_009

Bug Reports

Bug ID	Module	Summary	Severity	Priority	Steps	Expected Result	Actual Result	Environment
BUG_001	Login	Password with leading and trailing spaces is accepted and the user is logged in	Low	Low	1.Enter the registered email 2.Enter the correct password with spaces before and after it (" ValidPassword123! ") 3.Click Log in	The password is compared exactly as typed, so the login is rejected with an invalid credentials error	The extra spaces are ignored and the user is logged in successfully	Chrome / Desktop
BUG_002	Login	Page layout shifts and part of the left side becomes unreachable when a very long email is entered	Low	Low	1.Paste a very long string with no spaces into the email field 2.Press Ctrl+A, then the right arrow key, to move to the end of the text 3.Observe the page and try to scroll left	The layout stays intact, the input handles overflow, and no part of the page is cropped or unreachable	The page layout expanded and shifted, and part of the left side was cropped and could not be scrolled back into view. Clicking the login button or refreshing the page cleared it	Chrome / Desktop
BUG_003	Product Search	Searching special characters ('; --, ', ;) is slow, and ; causes a request timeout	Medium	Medium	1.Search for '; -- 2.Search for ' 3.Search for ; 4.Note the response time, status and number of results	The input is treated as plain search text, and the search returns relevant results or an empty state in a reasonable time with no errors	; -- returned 380 products (a partial list) after about 10.3 s. ' returned 153 products after about 5.5 s. ; did not load for more than 30 s and showed "a timeout occurred". No database error or SQL/PHP error text appeared, so this is a performance and availability issue and not a confirmed SQL injection	Chrome / Desktop
BUG_004	General / Performance	Common actions take 2 to 11 seconds to complete (filter, login, sort, search)	Low	Medium	1.Perform each action: apply a filter, log in, search, sort by price 2.Note how long each takes	Common actions complete within a few seconds, and the user gets feedback while waiting	Filter: 2.14s. Login: 2.178s. Search '; --: 10.96s. Sort: 3.61s.	Chrome / Desktop
